AMERICA INTERPRETATION

Listen with SIMO

Use these steps when your organizer provides a SIMO listener link. The languages, captions and interpreted audio available depend on the event settings.

Checklist

- Open the listener link provided by the meeting organizer.
- Choose the language you want to follow.
- If the event offers audio, connect your headphones and start listening.

Common risks

- If no language or captions appear, ask the host whether the session has started.
- If you hear two audio feeds, check which device is playing the meeting audio.

What America Interpretation can handle

- Help the organizer choose the appropriate language access option.
- Agree on a test with the organizer before sharing the instructions.

What organizers should prepare

- Share the event-specific listener link and the languages offered.
- Provide a support contact and tell participants whether to expect captions, audio or both.
